WORK HISTORY

SENIOR FRONTEND DEVELOPER 04/2024 to Current
Rabobank, Utrecht

- All-in-One Policy is a personal insurance package for Rabobank customers to arrange insurance online via Online Banking or the Rabo app
- Developed end-to-end new features with frontend and middleware with GraphQL
- Analyzed and improved codebase quality to make the app scalable for new features and minimize technical debt
- Utilized a shift-left testing approach to integrate quality assurance early in the development cycle, ensuring robust and reliable applications with unit tests and end-to-end tests
- Embraced Devops culture by continuously improving deployment pipelines and automated test cases for seamless integrations and ensuring integrity of critical flows using cloud services.

FRONTEND DEVELOPER 06/2022 to 03/2024
ABN AMRO, Amsterdam

- To rewrite the legacy application for improving employee experience on browsing & working with customer contracts
- From collecting requirements to UX designing, development, automated testing, and deploying - Have taken end-to-end responsibility of the application
- Got exposure to UX designing and passionately involved in designing new wireframes for backlog wishlist

FRONTEND DEVELOPER 07/2021 to 06/2022
Snappet, Utrecht

- Snappet is a digital educational platform. Here I was part of the team, to build a teacher dashboard for improving the learning results of children and to get real-time feedback on the student's progress
- Gained experience working on enterprise-level, monolith frontend applications built with Angular & GraphQL
- Got exposure to deal with large data sets for crafting charts & dashboards to show the learning results
- Learned writing GraphQL queries in the frontend for effective data fetching

FRONTEND DEVELOPER 08/2016 to 06/2021
ABN AMRO & ICS (via Infosys), India and Amsterdam

- Reinvented the Video Banking experience for ABN AMRO customers and bank advisors, so customers can have digital advice wherever and whenever they want
- Working within a strict six-month deadline, together with my team, we crafted a user-friendly system in close collaboration with UX designers and stakeholders
- Implemented optimization techniques, ensuring the app worked seamlessly in low connectivity areas and cutting down the KYC completion to just 2-3 minutes
- To build a web search portal from scratch using Angular 1.x and Elasticsearch, capable of searching information from multiple sources
- Participated in development of Java Spring Batch jobs for the web crawler and ETL modules

---
